Also available from Wing Enterprises, Inc. is the Little Giant Ladder System. It replaces several sizes of conventional and telescoping stepladders. It may be adjusted to fit safely on stairs and other uneven surfaces. The system comes complete with skid resistant feet, flared legs for improved stability, and stores in only one-fourth of its fully extended height.

Slim & Sturdy

Little Jumbo ladders fold to a slim 3' depth – steps pivot vertically while the framework tucks together for convenient storage. Even with those models incorporating the optional safety bar, folded depth is less than 5'.

You'll appreciate the smooth action of the sturdy locking system – no more pinched fingers or awkward set-up. And, of course, all ladder legs are capped with slip-resistant feet for a safe, solid feet.

Top-Quality Products

Wing manufactures a complete line of top-quality professional ladders – all built for long life and rugged, continuous use.

Ask about Wing's "Little Giant," the most versatile ladder on the market today, remarkably designed to provide 34 different ladder functions.

All Wing ladders are made in the U.S.A.
