

First, the MXZ is constructed of heavy-wall aircraft grade aluminum alloy.

Next, the MXZ is equipped with safety straps to prevent movement while in use. In addition, the built-in flare of the legs provides superior stability.

The MXZ is also equipped with skid-resistant feet which help prevent slippage (if kept in good repair.)

Movable work platform. You stand on it, we stand behind it.

To add to the versatility of the MXZ, a movable work platform is available. It fits on any rung, and supports up to 300 pounds. (Use it to hold everything from paint to people.)

Little Giant's lightweight, easy-to-attach work platform is a convenient accessory whenever additional stability is desired. It also serves as a handy tool stand.

An investment, not an expense.

Without a doubt, the MXZ will quickly pay for itself, not only in dollars and cents, but also in convenience and peace of mind.

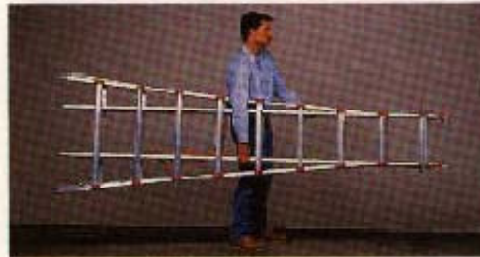

So when you have a tall order that needs to be done quickly and safely, rely on the MXZ.

Five year warranty.

We're so confident of the MXZ's strength and durability that it comes with a 5 year limited warranty. Frankly, that's about 59 months longer than most ladder warranties.

MXZ Specifications

Model Number	MXZ Size	Stepladder Height	Storage Height	Weight
10108	13'	7'0" to 13'0"	7'7"	58 lbs.
10109	15'	8'0" to 15'0"	8'7"	66 lbs.
10110	17'	9'0" to 17'0"	9'7"	79 lbs.
10119	19'	10'0" to 19'0"	10'7"	92 lbs.
10121	21'	11'0" to 21'0"	11'7"	103 lbs.

The Little Giant MXZ makes short work of tall orders.

Never before has it been so easy to tackle tall work.

The Little Giant MXZ makes replacing lights and performing other ceiling-height work in auditoriums, gymnasiums, racquetball courts and churches a simpler, far less time-consuming project. The inconvenience and expense of scaffolding or power lifts are, at last, no longer necessary.

A giant of a ladder.

The MXZ comes in five sizes: 13', 15', 17', 19', and 21'. The 13' size allows a 6' person (with arm extended) to reach as high as 18'. And remember that's in the middle of the room. The 15' size would

allow the same person to reach 20'. The 17' version would allow a reach up to 22'. The 19' version would allow a reach up to 24' and the 21' version would allow a reach up to 26'.

No other A-frame ladder can match that height capability.

But perhaps the MXZ's real beauty is its "fold-down" size. The MXZ 21' stores in just 11'8" by 3'9" by 7 3/4". (Shorter sizes of the MXZ have even smaller "fold-down" sizes.)

That makes moving through tight hallways and narrow doors a cinch compared to scaffolding and other large ladders. Obviously, set-up goes a lot faster as well.

Saves money as well as time.

While the MXZ eliminates the need for scaffolding or power lifts, it also eliminates the exorbitant costs of renting these items too.

That can easily mean savings of more than \$100 a day. If you do much "tall work" at all, the MXZ will shortly pay for itself.

Safety is a strong point.

Cost efficiency and convenience aren't the MXZ's only selling points. When properly used, the MXZ is also safer than any typical heavy-duty industrial ladder. Here's why:
