

No magic act is complete without the extras. When you purchase your Little Giant, you'll want to consider the following accessories:

If the act calls for extra stability, the *movable work platform* attaches easily to any rung and slides out when needed. Even though it's lightweight, it will support a magician and his assistant, or anything else that weighs up to 225 lbs.

When working around windows, rain gutters, bushes, overhangs and other obstacles, make a tricky job safe and easy with the *quick-mounting wall stand-off*.

If the job calls for a plank, put something special up your sleeve: a Little Giant 9', 13' or 16' *telescoping plank*. Made of heavy-wall aluminum, these durable, high-strength planks store and haul in nearly half of their extended length. They won't twist, flex, bow, sway or warp. Plus, they're light enough for easy set-up and handling, and feature a slip-resistant surface for sure-footed safety.

Once again, illusion becomes reality and the impossible becomes possible with the Little Giant *leg leveler*. This adjustable accessory quickly squares up the ladder on uneven surfaces. It's easy to attach, safe, stable, and meets the high-strength and performance standards set by the ladder itself.
